Folding Screen Paintings of the Gion Festival

5. 研究活動報告/ Research Report

(1) 研究活動の概要/ Summary of Research Results

Over the course of one month of the fellowship, I observed various parts of the Gion Festival, including the construction and procession of festival floats (*yama* and *hoko*), the transfer of portable shrines to the Otabisho, and the display of screen paintings and sacred images used on many of the *yama* floats. I was also able to study firsthand one screen painting of the festival belonging to the Hachimanyama Hozonkai displayed before the festival. In Tokyo I studied photographs of other screen paintings of the Gion Festival and made preliminary steps to view these screen paintings at museums in Japan during a subsequent visit in the fall, 2022.

(2) 研究キーワード/ Keywords

Gion Festival, *yama* / *hoko*, screen paintings, *byōbu-matsuri*

(3) 主な研究発表 (雑誌論文、学会、集会、知的財産権等)/ Main Research Publications

I will give a lecture about my research at an upcoming conference of the JSPS at Harvard University in November 2022.

(4) その他/ Remarks

One month is of course insufficient to conduct thorough research on such a complex topic, but I was able to collect books and articles about Gion Festival screen paintings and confirm a number of aspects of the festival that I had not known previously.
