

Stone Age Science:

INSIGHTS INTO THE DEEP HUMAN PAST

The Department of Anthropology at Kent State University will be hosting a FREE Archaeology Lecture Series on Friday, February 14, 2020.

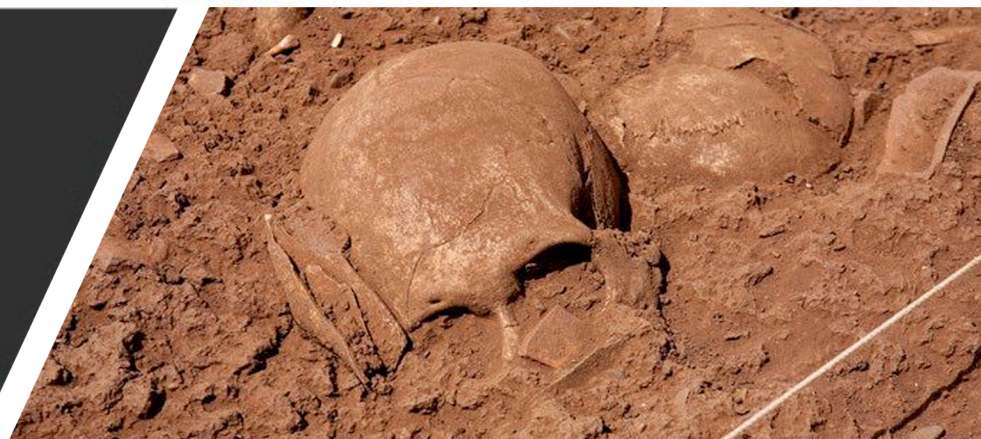

Presentations will be in The College of Architecture and Environmental Design (CAED 120)

1:00 PM: Japan Society for the Promotion of Science (JSPS)
Informational session about collaboration and student research opportunities in Japan

1:30 PM: Dr. Metin I. Eren (Kent State University),
"Reverse engineering the Stone Age through experiments"

2:30 PM: Dr. Linda Spurlock (Kent State University),
"Manot Cave: A Middle and Upper Paleolithic site in Western Galilee, Israel"

3:30 PM: Dr. Michelle R. Bebber (Kent State University),
"Design Principles in Stone Age Art and Tools"

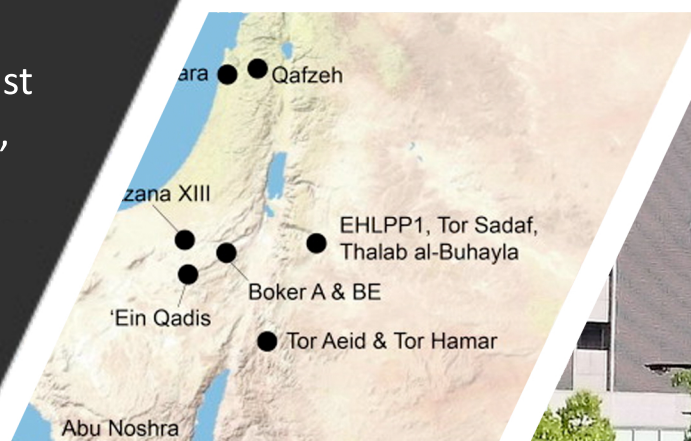

4:30 PM [Intermission]

6:00 PM: Dr. Seiji Kadowaki (Nagoya University, Japan),
"News from the desert: Stone Age behaviors and population changes from Neanderthals to modern humans in the Levant"

7:00 PM: Dr. David J. Meltzer (Southern Methodist University, Texas: National Academy of Sciences),
"Archaeology, ancient DNA, and the Ice Age peopling of the Americas"

COLONIZING ICE AGE AMERICA

This lecture series is generously sponsored by the **Japan Society for the Promotion of Science (JSPS)**. JSPS officers will host an **informational session at 1 PM (in CAED 120)** describing their various programs to support collaborations between Japanese and American researchers.

We hope you will be able to join us. Space is limited – please email meren@kent.edu to reserve your spot!!!
